

EFFECTS OF TREE NEGLIGENCE

June 13, 2018

OVERVIEW

1. Project Background and Description

Many people think that trees will grow and be healthy without our help, but for trees to thrive, we must care for them. Start by selecting the right species of tree to plant on the site, plant the tree properly, and provide timely maintenance throughout its life. According to the South Carolina Government Forestry Commission, the most neglected part of tree care is pruning. The average tree caregiver does not prune solely because the lack of information, causing diseased, ugly trees.

2. Project Scope

- Provide a website that will outline the following:
 - When and how to properly prune trees.
 - Outline the symptoms associated with tree diseases.
 - Include known risks associated to tree negligence.
 - Provide annual care plans and tree tips for caregivers.

3. Specific Exclusions from Scope

- Risks associated to alternative options
- References on Midwives or OB/GYN
- Recommendations on birth centers/hospitals
- Specifics regarding insurance coverage for receiving an epidural or alternative option

4. Affected Parties

- Tree caregivers
- Areas with trees.

5. Project Plan

Project Scope	Deliverables/Outcomes
Proper Tree Care Information.	<ul style="list-style-type: none">• Create a website with information on proper tree care, known diseases, and an annual care plan for trees.
Place small fliers with rubber band with information providing link and neighborhood initiative to improve tree aesthetic.	<ul style="list-style-type: none">• Determine locations for where the fliers will be placed

6. Project Team Qualifications

Tree Caregivers enthusiastic about tree health and care, extending messages and professional advice regarding trees by Government Forestry Commissions.

7. Benefits of Project

Community influence and initiative to provide proper tree care among tree caregivers resulting in healthier trees, cleaner air, and beautiful communities.

8. Conclusion

By creating the tree care website and distributing fliers, we hope to educate tree caregivers on the risks associated with tree negligence and the benefits of proper tree care. We want to assist tree caregivers in making educated decisions in caring for their trees, resulting in happier trees around the community and overall appeal.
